

Promoting Music interventions across life stages

Infographic by Team Tangerine

Shuchang Li, Junguang Long, Yiran Xiang, Zhiyun Zhang, Zhixin Zhou

Target Audience

- Government & policymakers
- School administrators
- Researchers from multidisciplinary scientific fields

Our Goal

We aim to raise awareness of music and to further advocate for implementing policies to increase music funding and integrate music programs within diverse educational settings

95%

of Americans believed music is a key component

Why Music?

- Contribute to Psychological Development
- Enhance Academic Performance
- Better Social-emotional skills

80%

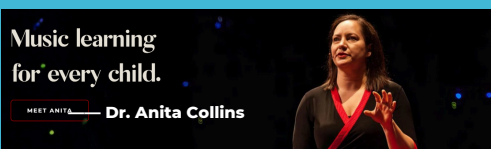

of U.S. school districts have experienced significant reductions

Research Evidence

- Prenatal and Infancy music exposure benefits neural, cognitive, and emotional development
- Music education in childhood and adolescence improves working memory, spatial-temporal skills, and strengthens academic performance
- Music therapy enhances skills and resilience in special needs populations.

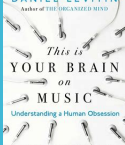

Useful Resources

The Benefits of Music Education

Daniel J. Levitin

"Our brains are **wired** to make music make sense, even when it doesn't."

MyMusicJournal offers a Comprehensive and high-quality music curriculum, including ear training, composition activities, note naming exercises, instruments of the orchestra and composer exploration.

Implications

Preschool

Practice:

- Provide musical activities in local community;
- Offer basic music strategies training;
- Music therapy program in hospital;

Policy:

- Fundings for community music programs;
- Establishment of music education institution and corporate with the community;
- Integrating music therapy into pediatric programs.

Schoolers

Practice:

- Ensure music programs in resource-poor areas
- Fill music education teachers shortage
- Promoting family involvement

Policy:

- Increase in earmarked funding for music education
- Policy and curriculum to protect and expand music education

Practice:

- Create space for real-world data collection.
- Integrate music into education and therapy.
- Foster cross-disciplinary collaboration.

Policy:

- Promote Evidence-Based Policies.
- Secure Funding for Music Research.
- Support diverse cultural & socioeconomic, and neurodiverse populations.

Researchers

Special Needs

Practice:

- Fund music therapy programs and tools.
- Promote music for social development.
- Include music therapy in insurance.

Policy:

- Use NMT to improve motor skills.
- Implement V2R for social skills.
- Apply music for emotion recognition.
